

Roof Monsters: Turn 40 Years of Trust Into More Calls, More Estimates, and More Jobs

A business-facing growth plan for Terrance McKeever Enterprises dba Roof Monsters. This translates the website audit into outcomes, benefits, pricing, and a phased timeline. A working demo rebuild is already in progress for review.

Prepared: June 2026 **Market:** Tampa Bay — Pasco, Pinellas, Hillsborough, Hernando, Manatee

Strengths: 40-year legacy, Atlas warranties, \$750 hero discount, strong testimonials

Gap: Live site shows broken stats, placeholder copy, weak gallery, limited local SEO

The short version: Roof Monsters wins on the phone and in the field. The website should prove that before a homeowner ever calls. We fix trust killers first, launch a fast custom site with real project proof, then compound with local SEO, reviews, and lead follow-up.

Recommended path	Setup	Monthly
1. Free Access + Baseline Review	\$0	—
2. Full Growth Launch (custom site + SEO/GBP + tracking + hosting)	\$4,500	\$350
3. Lead Follow-Up System (optional CRM + review requests)	+\$1,000	+\$250

What we found on the live site

0+
BROKEN COUNTERS
Experience and project stats display zero on key pages — undermines a 40-year brand.

D
GALLERY PROOF
Placeholder text and missing project photos where homeowners need visual proof most.

~4.5★
GOOGLE REPUTATION
Solid reviews, but not prominently surfaced on-site to convert comparison shoppers.

\$750
OFFER STRENGTH
Military/first responder/teacher discount is compelling — deserves a dedicated conversion path.

5
COUNTIES SERVED
Wide footprint without city landing pages = missed "near me" search traffic.

15yr
WARRANTY HOOK
Atlas + workmanship story is strong — should be on every service page and CTA block.

Demo preview ready: A faster rebuild prototype is running locally with working stats, service pages, special offers layout, testimonial carousel, and mobile navigation. Review at <http://127.0.0.1:5500/> before production launch.

What we would improve and why it matters

Workstream	What we do	Business benefit	Expected impact
Trust fix + proof	Real stats, remove placeholder copy, project gallery, license/insurance/Atlas badges	Homeowners trust you before the first call — especially after storm damage	10–25% higher form + call rate from existing traffic
Fast custom website	Replace slow WordPress with static/custom build: hero, services, offers, contact, blog shell	Faster mobile load during hurricane season; fewer bounces from paid/directory clicks	15–30% better mobile engagement; lower cost per lead on ads

Workstream	What we do	Business benefit	Expected impact
Local SEO pages	City + service pages: Clearwater, Tampa, St. Pete, storm damage, replacement, TPO commercial	Rank for "roofer near me" and city-specific high-intent searches	20–50% organic lead growth over 6–12 months with maintenance
Schema + technical SEO	RoofingContractor, LocalBusiness, services, breadcrumbs, FAQ where appropriate	Google understands service area, warranties, and business entity	5–15% CTR lift on qualifying search results
Review growth system	On-site Google rating widget + post-job review request flow	More 5-star reviews = more map-pack visibility and higher close rate	2–5 new reviews/month with consistent follow-up
Conversion tracking	GA4 events: click_call, submit_estimate, click_offer, click_review	Know which pages and campaigns actually produce jobs	Data-driven ad and directory spend decisions
Lead follow-up (optional)	CRM pipeline: new lead → contacted → estimate scheduled → won/lost + SMS/email reminders	No estimate request sits unanswered after hours or busy storm weeks	10–20% more booked estimates from same lead volume

Why a custom build beats patching WordPress

- **Speed:** Storm-season searches happen on phones with weak signal — every second counts.
- **Control:** No plugin conflicts breaking counters, forms, or layout after updates.
- **Proof:** Gallery, warranties, and team bios stay intentional — not theme defaults.
- **Cost:** One build + modest monthly ops beats repeated emergency WP fixes.

What Roof Monsters keeps (we don't reinvent your brand)

- "Your Roof Is Our Proof" positioning
- Atlas warranty story and 15-year workmanship guarantee
- \$750 military / first responder / teacher offer
- Existing testimonials, blog posts, phone number, and service area
- Family-owned, Florida-native story since 1988

Estimated timeline

Week 1	Discovery: GBP, GSC, GA4, form routing, photo collection, stat verification, demo walkthrough.
Weeks 2–5	Custom site build: all pages, gallery, schema, tracking, image optimization, redirects from old URLs.
Week 6	Launch + QA: Lighthouse pass, mobile test, form delivery test, call tracking verification.
Months 2–3	Local SEO: city/service pages, GBP posts, review requests, blog interlinking.
Months 3–6	Compounding: storm-season content, conversion tweaks, optional CRM automation.

Pricing

Package	Setup	Monthly	Includes
Free Access + Baseline Review	\$0	—	GBP/GSC/GA4 review, lead-path audit, fixed quote for full launch
Full Growth Launch	\$4,500	\$350	Custom site, gallery, schema, tracking, hosting, 2 city pages at launch, monthly GBP + SEO maintenance
Lead Follow-Up System (add-on)	+\$1,000	+\$250	CRM setup, review requests, missed-lead alerts, estimate reminders

Pricing is directional for the proposal conversation. Final quote confirmed after access review and scope sign-off. Additional city pages: ~\$150/page or bundled in growth retainer.

ROI in plain language

One additional roof replacement job from better local search or a faster mobile site typically covers the full website investment. The goal is not a prettier site — it is **more qualified estimates** from homeowners who already trust family-owned contractors, but leave when the site looks broken or unfinished.

Roof Monsters already wins on responsiveness and craftsmanship. The website should finally match that.
